Tired of poor support, slow servers and network downtime? Or how about 'unlimited' hosting plans that are not really unlimited, but merely a marketing gimmick by large companies and fly-by-night hosts to offer you the world, but never actually deliver it?

Welcome to your new hosting solution. Why do we stand out from the crowd? It's simple really, as our name implies we are always here for you when you need us. By providing our clients with premium hosting services backed by excellent customer support and caring staff we are able to provide you with unparalleled service..

How do we do it? By not "over selling" our servers and charging a fair but extremely affordable price for our hosting solutions. Add extensive monitoring on all our servers and ports, on call tech staff and well maintained systems and networks. We are not going to offer you the world, and we aren't going to pretend we can. We are offering a real, reliable hosting experience that you, and your website deserve at an affordable price. So affordable that you can begin hosting your website with us for as little as \$2.50 a month including a free domain name for as long as you are with us!

We don't believe in nickel-and-diming you like other hosts for "extra's" that should be included in the first place. We make it simple, there is our Start Up plan perfect for your first website, or small site solution. As your website grows and you require more space we can easily upgrade your account for you and you can enjoy all the benefits of our un-metered plan. Should your site become large and popular we can work with you to develop the perfect solution, right up to a fully managed dedicated server.
